

Crafted for Exceptional Spaces

SOLID WOOD
Top layer of the Luxapanel is made from abachi, ash or oak.

TIMELESS DESIGN
Geometrical patterns and elegant finish will enhance any room.

EASY TO INSTALL
Panels are crafted with precision for a seamless fit on any type of base wall.

Make it special

- ① high quality wall panels for various interior solutions, specializing also on sauna wall panels.
- ② We mainly use solid thermally treated wood as the main material and moisture proof plywood for the base of the panels.
- ③ We only use responsibly sourced materials and test our products thoroughly to maintain highest standards of quality.
- ④ We are actively looking for partners among interior designers, architects and sauna builders. **Samples of all designs are available upon request.**

Sauna & Wall Panels

Perfect for saunas

HEAT PROOF
Sauna panels are made from certified and thermally treated wood that will preserve its appearance in sauna conditions.

MOISTURE PROOF
Thermally treated wood combined with a moisture proof base layer remains stable in humid conditions.
Not suitable for steam saunas.

EASY TO INSTALL
Precise and elaborate design allows for a seamless fit and ease of installation.

Saunas are not just for the sweat, but for the replenishment of the mind and the body. Every detail in this sacred space must be considered. Solid natural wood, timeless and elegant design, exceptional quality - this is our belief and promise.

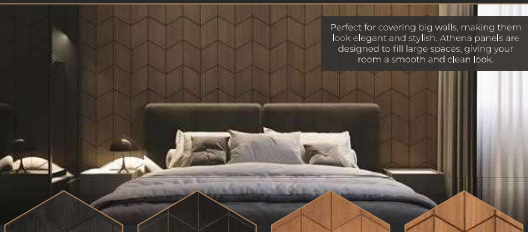

LED

D fits perfectly with the panels and can be used in saunas, but also in endless interior solutions.

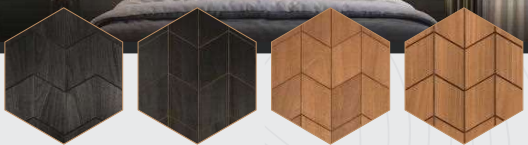

- ✔ Heat and moisture resistant.
- ✔ 3000K
- ✔ Easy to install
